

Typical depths shown. For specific bioretention design details refer to engineer's details

**Installation Note:**

The materials in this profile have been selected with consideration to their "bridging" properties. Alternative materials may not be compatible. Filter fabrics are not to be used. Install so that there is a clear distinction between layers, do not mix layers.

Profile designed on principles as outlined in the Facility for Advancing Water Biofiltration (FAWB) Guidelines for Soil Filter Media in Bioretention Systems (version 3.01) June 2009.
