# Longer Handles on Plasson Ball Valves 1 1/2" and 2"

## Plasson Polyamide Glass Reinforced Ball Valves

### Key Features

- ✓ Full Bore flow – minimising pressure drop
- ✓ Compliant with AS5830-2 'In-line ball valves for use in plumbing water supply systems (plastic-bodied)'
- ✓ Compliant with AS/NZS4020 'Testing of products for use in contact with drinking water'
- ✓ PN16 rated
- ✓ Double seal on spindle to prevent leakage
- ✓ Chemical resistant O-Ring
- ✓ Handle can be locked off with Plasson's stainless steel lockable accessory
- ✓ Removable handle
- ✓ BSP threaded
- ✓ Optional drain port for line testing or draining

The long handle provides smooth and easy operation of the valve at high line pressures.

Short handles are still available. Please contact Plasson to discuss your requirements.

Plasson's Ball Valve is manufactured entirely of high quality, hard-wearing plastics which eliminate the risk of corrosion and remove metal contact with water.

The valve is a full bore to minimise head loss. An optional drain port version of the valve allows sampling of potable water systems, monitoring of system pressure and drainage of the line.

Plasson's valve also allows a simple and direct connection to hoses. The valve handle is detachable and the valve can be made tamper-proof by using Plasson's locking accessory.

### Materials of construction

- ✓ Body and Spindle – PA-GR
- ✓ Ball – PP-GR
- ✓ Ball-Seat – LLDPE
- ✓ Handle – PP-GR
- ✓ O-Rings – EPDM
